

KATANA contains 250 g/kg flazasulfuron

RELIABLE RESIDUAL WEED CONTROL

Testimonial from Tanner Dozois Vineyard Manager Campbells Winery Rutherglen, Victoria

Campbells of Rutherglen is a fifth generation family owned winery located in Rutherglen, Victoria.

Tanner Dozois is the Vineyard Manager overseeing the operations of the vineyards.

Last August, Campbells applied Katana 250 WG Herbicide, a new herbicide from AgNova Technologies, over part of the vineyard.

Katana is a soil residual herbicide which provides a new mode of action in grapevines, and can also be used in citrus and olives.

"We applied Katana in early August and found it did an amazing job, especially on wireweed and on our reworked blocks. It has kept everything at bay and saved me having to get the whipper snipper out to slash the weeds!"

Katana has proven to provide excellent and reliable residual control of weeds, and I'll be using it again this season in combination with Hellcat which gives really quick brownout!!"

Hellcat® is a broad spectrum, knockdown herbicide, consisting of a convenient co-formulation of glufosinate-ammonium and carfentrazone-ethyl. This combination of Group 10 and Group 14 actives is useful for resistance management and has a range of registered uses, including grapevines.

The Katana Hellcat mix is very effective on both broadleaves and grasses.

Campbells Vineyard Manager Tanner Dozois and AgNova Area Sales Manager Brad Johnson

Excellent weed control 12 months after application
