## DeltaMicro® combi 2 - A New Micronutrient Fertiliser

DeltaMicro combi 2 is a new microgranulated foliar fertiliser containing multiple macronutrients plus micronutrients designed to treat visible trace element deficiencies and prevent latent trace element deficiencies in plants.

## Tank Mixing and Physical Compatibilities

DeltaMicro combi 2 has been tested in the laboratory for physical compatibility in a range of two-way mixtures that include many commonly used products.

Results are summarised in the table below, and must be read in conjunction with the notes on page 2.

## Please Note:

- DeltaMicro combi 2 has been tested for physical compatibility in Australia with only the brand names listed in this AgNote, and with formulations of each product available at time of testing. Environmental conditions and product formulations can influence crop safety and may impact the result under local conditions, regardless of the findings presented herein. Hence, this information should be treated as a guide only.
- It is essential that growers read the labels of potential tank mix products thoroughly for any use restrictions that may apply, and conduct their own small scale trials prior to mixing and applying commercial quantities.
- It is strongly recommended that no more than one product is tank mixed with the nominated fertiliser product.
