

WUXAL[®]

Liquid

A high quality balanced NPK plus micronutrients liquid foliar fertiliser with a proven track record. Formulated for optimum uptake in fruit, vegetables, field crops and in nurseries. Wuxal[®] Liquid is suitable for use wherever improved plant growth and quality is desired.

Wuxal Liquid:

- Proven performance by Australian growers.
- Is an ideal balanced supply of macro and micro nutrients that are readily available to plants.
- Contains humectants, surfactants, anti-evaporants and stickers provide unmatched nutrient uptake.
- Requires no buffers or acidifying surfactants. Wuxal regulates pH of the spray solution and the superchelation reduces effects of water hardness.
- Is suitable for use on all crops and in all climates.
- Improves growth, flowering, yield potential and quality, particularly under stress conditions of drought, heat or water logging.
- Has excellent crop safety and can be applied with all standard high and low volume spraying equipment.
- Is compatible with most commonly used fungicides and insecticides (except lime sulphur and Bordeaux mixtures).
- Leaves no unsightly residues and is suitable for the improvement of leaf colour and shine on ornamental plants shortly before they are sold.
- Is available in 20 and 200 Litre drums.
