Basfoliar® Sun Protect™

DIRECTIONS FOR USE

Application timing

Begin applications prior to damaging heat and radiation conditions (i.e. heat events >28°C and/or high radiation) responsible for crop damage. Basfoliar Sun Protect must be applied 3 to 2 days prior to damaging conditions. Multiple applications are generally more effective than a single application. In a program commencing prior to heat events, each application of Basfoliar Sun Protect will provide protection for approximately 7 days. Continue applications at an interval not greater than 7 days while the risk of damaging heat events persists. Use local weather services for planning application programs.

CROP	RATE	CRITICAL COMMENTS
Vegetables: Tomatoes and capsicums	1.5 to 2.0 L/ha	Commence applications at early fruit set. The higher rate will provide increased protection. Follow application timing instructions.

WITHHOLDING PERIOD

NOT REQUIRED WHEN USED AS DIRECTED

GENERAL INSTRUCTIONS

MIXING

Shake well before use. Slowly pour Basfoliar Sun Protect into the spray tank three-quarters filled with water and with agitation running. Alternatively, prepare a pre-mix by adding Basfoliar Sun Protect in equal parts with water and stir immediately. Add this mixture to the water in the spray tank with agitation running.

APPLICATION

Vegetables

Use a spray volume of around 500 L/ha and apply using a medium droplet size. The spray volume should match the canopy size, increasing as the crop grows. Ensure thorough, even coverage of all plant parts.

COMPATIBILITY

Basfoliar Sun Protect should be applied alone without a tank-mix partner. AgNova plans to test a range of potential mixture partners with Basfoliar Sun Protect in Australian crops so that further compatibility guidance can be given to growers in future seasons.

STORAGE AND DISPOSAL

Store in the closed, original container in a cool (+5°C to +30°C), well-ventilated area. Do not store for prolonged periods in direct sunlight. Triple-rinse containers before disposal. Add rinsings to spray tank. Do not dispose of undiluted chemicals on site. If recycling, replace cap and return clean containers to recycler or designated collection point. If not recycling, break, crush, or puncture and deliver empty packaging to an approved waste management facility. If an approved waste management facility is not available, bury the empty packaging 500 mm below the surface in a disposal pit specifically marked and set up for this purpose, clear of waterways, desirable vegetation and tree roots, in compliance with relevant local, state or territory government regulations. Do not burn empty containers or product.

SAFETY DIRECTIONS

Will irritate the eyes. Avoid contact with eyes and skin. If product in eyes wash immediately. Wash hands after use.

FIRST AID

If poisoning occurs contact a doctor or Poisons Information Centre. Phone Australia 13 11 26.

SAFETY DATA SHEET

If additional hazard information is required refer to the Safety Data Sheet. For a copy visit our website at agnova.com.au

CONDITIONS OF SALE

AgNova Technologies Pty Ltd shall not be liable for any consequential or other loss or damage relating to the supply or subsequent handling or use of this product, unless such liability by law cannot be lawfully excluded or limited. All warranties, conditions or rights implied by statute or other law which may be lawfully excluded are so excluded. Where the liability of AgNova Technologies Pty Ltd for breach of any such statutory warranties and conditions cannot be lawfully excluded but may be limited to it re-supplying the product or an equivalent product or the cost of a product or an equivalent product, then the liability of AgNova Technologies Pty Ltd for any breach of such statutory warranty or condition is so limited.
