DIRECTIONS FOR USE

SITUATION	METHOD	RATE	
		per ha	per 100 L
Cereals	Apply with post emergence herbicide sprays as a source of trace elements and to improve growth.	5 - 10 L	
Citrus	Apply shortly before blossom, at petal fall and again one or more times at 4 weekly intervals.	2 - 4 L	100 - 200 mL
Field Crops: cotton, hops, linseed, peanuts, peas, potatoes, safflower, soybeans, sunflower etc	Apply in combination with normal pesticide sprays beginning before flowering. Suitable for aerial as well as ground applications.	2 - 3 L	
Fruit, especially berry crops, strawberries	Apply one spray before blossom, then a further 2 to 4 sprays in combination with normal pesticide applications.	2 - 4 L	100 - 200 mL
Fruit trees such as pome fruit, tropical fruit	Apply one spray before blossom, then a further 2 to 4 sprays in combination with normal pesticide applications.	2.5 - 5 L	100 - 200 mL
Grapevines	Apply at least once before flowering, then several times at regular intervals with post flowering pesticide sprays.	2 - 4 L	200 - 400 mL
Ornamentals	Apply weekly to roots and foliage.		125 - 250 mL
Tobacco	Apply when growth has stopped, in combination with normal insecticide or fungicide sprays.	1 - 2 L	100 - 200 mL
Tree nurseries	Apply at weekly intervals, either to the soil or as a foliar spray		soil drench: 100 - 300 mL or foliar spray: 50 - 200 mL
Turf	Apply weekly.		50 mL / 25 L spray / 100 m ²
Vegetables	Use 3 to 5 applications in combination with normal insecticide or fungicide sprays.	4 -6 L	400 - 600 mL

GENERAL INSTRUCTIONS

Wuxal Liquid can be applied using a wide range of spray equipment.

Foliar Nutrient

Optimal results from foliar application will be achieved by high volume application made under slow drying conditions, e.g. early morning, late afternoon, dull or humid days.

Note

Wuxal Liquid should be used as a complement to, not a replacement for, conventional fertiliser applications and normal cultivation practices.

Compatibility

Wuxal Liquid is compatible with *Bacillus thuringiensis* (wetable powder formulations), gibberellic acid (GA3), copper oxychloride, (providing the mixture is used immediately after preparation and the agitator is kept running), abamectin and most commonly used insecticides, fungicides and herbicides. It is NOT compatible with lime sulphur or Bordeaux mixtures.

CONDITIONS OF SALE

AgNova Technologies Pty Ltd shall not be liable for any consequential or other loss or damage relating to the supply or subsequent handling or use of this product, unless such liability by law cannot be lawfully excluded or limited. All warranties, conditions or rights implied by statute or other law which may be lawfully excluded are so excluded. Where the liability of AgNova Technologies Pty Ltd for breach of any such statutory warranties and conditions cannot be lawfully excluded but may be limited to it re-supplying the product or an equivalent product or the cost of a product or an equivalent product, then the liability of AgNova Technologies Pty Ltd for any breach of such statutory warranty or condition is so limited.
