Suitable Extinguishing Equipment: Use dry chemical, foam or CO₂. If water is used to fight fire, dike and collect runoff.

Specific Hazards Arising from the Chemical: This material can be thermally unstable at elevated temperatures. During a fire, irritating and possible toxic gases may be generated by thermal decomposition or combustion.

Special Protective Equipment and Precautions for Firefighters: Wear full protective clothing and self-contained positive pressure breathing apparatus. Evacuate personnel and keep upwind of fire. If area is heavily exposed to fire and if conditions permit, let fire burn itself out since water may increase the area contaminated. Do not allow run-off from firefighting to enter drains or water courses. Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations.

6. ACCIDENTAL RELEASE MEASURES

Personal Precautions, Protective Equipment and Emergency Procedures: Isolate area and keep unnecessary and unprotected personnel from entering. Wear suitable personal protective clothing and equipment as described in Section 8 of this document. Ensure adequate ventilation.

Environmental Precautions: Contain spillage and minimise spread. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high-water mark. Keep out of drains, sewers, ditches and water ways. Do NOT contaminate water when disposing of rinse waters.
