5. FIRE FIGHTING MEASURES

Suitable Extinguishing Media: Water spray, foam, dry agent carbon dioxide, sand.

Specific Hazards Arising from the Chemical: In a fire, formation of hydrogen cyanide, carbon monoxide, sulphur dioxide and nitrogen oxides can be expected.

Special Protective Equipment and Precautions for Fire Fighters: This product is sensitive to dust explosion. Fire fighters should wear full protective gear, including self-contained breathing apparatus (AS/NZS 1715/1716). Keep unnecessary people away. If it can be done safely, remove intact containers from the fire. Bund area with sand or earth to prevent contamination of drains or waterways. Dispose of extinguishing agent and spillage safely later.

6. ACCIDENTAL RELEASE MEASURES

Personal Precautions, Protective Equipment and Emergency Procedures: Avoid contact with spilled material or contaminated surfaces. Extinguish possible sources of ignition. Do not smoke, eat or drink during the clean up process. Wear protective clothing and equipment as detailed in Section 8 PERSONAL PROTECTION. Keep people and animals away.

Environmental Precautions: Prevent spilled material from entering drains or watercourses. If contamination of drains, streams, watercourses etc. is unavoidable, warn the local water authority.

Methods and Materials for Containment and Cleaning Up: Avoid creation of dust, damping down if necessary. Sweep up and collect and store in properly labelled drums for safe disposal. Clean floor with a damp cloth and place in the drum. Seal drums label ready for safe disposal. Deal with all spillages immediately. Observe government regulations.

7. HANDLING AND STORAGE

Precautions for Safe Handling: Keep out of reach of children. Do not allow water soluble bags to be splashed with water or handle with wet gloves.

SAFETY DATA SHEET

CHIPPOLAY™ SELECTIVE HERBICIDE

Conditions for Safe Storage, including any Incompatibilities: Store in the closed, original container in a dry, cool, well-ventilated area out of direct sunlight. Store product under dry conditions. Keep from contact with fertilisers, insecticides, fungicides and seeds. This product may cause dust explosion, if water soluble bag is broken. Fine dust particles can form explosive mixtures with air.

8. EXPOSURE CONTROLS AND PERSONAL PROTECTION

Exposure Control Measures: The National Occupational Health and Safety Commission (NOHSC) exposure standards:
TWA for kaolin is 10 mg/m³ (as inspirable dust)
STEL for silica, quartz is 0.2 mg/m³

Definitions:

Exposure standard- Time Weighted Average (TWA) means the average airborne concentration of a particular substance when calculated over a normal eight-hour working day, for five-day working week.

Exposure standard – Short Term Exposure limit (STEL) means a 15 minute TWA exposure which should not be exceeded at any time during a working day even if the eight-hour TWA average is within the TWA exposure standard. Exposures at the STEL should not be longer than 15 minutes and should not be repeated more than four times per day. There should be at least 60 minutes between successive exposures at the STEL.

Biological Monitoring: No data available

Control Banding: No data available

Engineering Controls: Control process conditions to avoid contact. Use in a well-ventilated area only.

Individual Protection Measures, for example, Personal Protective Equipment (PPE):
Eyes: Safety goggles if exposure is possible.
Clothing: Suitable work clothes to avoid skin contact with the product.
Gloves: Elbow-length PVC gloves if exposure to the product is likely.
Respiratory: Wear a respirator if inhalation is possible.
