

Nutritional specialty product that optimises cell membrane elasticity and permeability.

*Assists in optimising fruit quality, colour and maximising fruit size.
(9-4-7-0)*

Ingredients:	w/w
N as urea	9.0%
Total Nitrogen (N)	9.0%
P as citrate soluble	3.5%
Total Phosphorus (P)	3.5%
Total Potassium (K)	6.6%
Fatty Alcohols	5.0%

Impurities:

5 g biuret/kg N
0.002% w/w molybdenum
5 mg/kg cadmium (maximum)
5 mg/kg mercury (maximum)

DIRECTIONS FOR USE

Application timing

Use Premio® in a program. Begin applications from fruit set onwards, i.e. crop stage BBCH 72: green ovary surrounded by dying sepal crown, sepals beginning to fall. Continue applications at an interval no greater than 10–15 days. Ensure an application is made 14 days prior to harvest. Can be used up to the time of harvest.

Crop	Rate	Comments
Cherries	200 mL/100 L water	Commence applications from fruit set. Follow application timing instructions. The use of Premio may slightly advance colour development and harvest.

Mixing

Shake well before use. Slowly pour Premio into the spray tank three-quarters filled with water and with agitation running. Alternatively, prepare a pre-mix by adding Premio in equal parts with water and stir immediately. Add this mixture to the water in the spray tank with agitation running.

Application

Cherries:

Use a spray volume of 1000 to 2000 L/ha and apply using a medium droplet size. The spray volume should match the canopy size, increasing as the crop grows. Ensure thorough, even coverage of all plant parts. Only apply to healthy trees. For further information on application, contact your local AgNova representative or visit our website at agnova.com.au

Compatibility

Premio has been tested for compatibility with a very limited range of mixing partners.

For information on compatibility contact your local AgNova representative or visit our website at agnova.com.au

STORAGE AND DISPOSAL

Store in the closed, original container in a cool (5°C to 30°C), well-ventilated area. Do not store for prolonged periods in direct sunlight. Triple-rinse containers before disposal. Add rinsings to spray tank. Do not dispose of undiluted chemicals on site. If recycling, replace cap and return clean containers to recycler or designated collection point. If not recycling, break, crush, or puncture and deliver empty packaging to an approved waste management facility. If an approved waste management facility is not available, bury the empty packaging 500 mm below the surface in a disposal pit specifically marked and set up for this purpose, clear of waterways, desirable vegetation and tree roots, in compliance with relevant local, state or territory government regulations. Do not burn empty containers or product.

WARNING – Do not swallow. The spray from this product may act as an irritant. Avoid inhalation and contact with the eyes and skin. This product contains heavy metals including cadmium and mercury. Its use may result in accumulation of cadmium and mercury in the soil and may lead to residue levels in plant and animal products in excess of the maximum level specified by the Australia New Zealand Food Standards Code.

SAFETY DATA SHEET

If additional hazard information is required refer to the Safety Data Sheet. For a copy visit our website at agnova.com.au

CONDITIONS OF SALE

AgNova Technologies Pty Ltd shall not be liable for any consequential or other loss or damage relating to the supply or subsequent handling or use of this product, unless such liability by law cannot be lawfully excluded or limited. All warranties, conditions or rights implied by statute or other law which may be lawfully excluded are so excluded. Where the liability of AgNova Technologies Pty Ltd for breach of any such statutory warranties and conditions cannot be lawfully excluded but may be limited to it re-supplying the product or an equivalent product or the cost of a product or an equivalent product, then the liability of AgNova Technologies Pty Ltd for any breach of such statutory warranty or condition is so limited.
